

SARTH DHARMESHBHAI NAROLA

B.Tech. - Computer Science & Engineering

Ph: +91-7046053000

Email: 23bce194@nirmauni.ac.in

Gandhinagar, Gujarat, India - 382421

LinkedIn: <https://linkedin.com/in/sarth-narola-223002323>

PROFESSIONAL SUMMARY

I am a B.Tech Computer Science and Engineering student at Nirma University (CGPA: 9.11) with a strong passion for Software Development, Full Stack Engineering, and Artificial Intelligence. I have hands-on experience in designing and developing production-ready web applications using the MERN Stack, FastAPI, PostgreSQL, MongoDB, and modern AI technologies such as LangChain, RAG, FAISS, and Large Language Models. During my internship at UNIKWORK, I worked on enterprise web applications, API integrations, and scalable software solutions in an Agile environment. I was selected for Amazon Machine Learning Summer School 2025, where I gained exposure to advanced machine learning concepts under Amazon Scientists. I enjoy solving complex problems through competitive programming and building innovative solutions that create real-world impact. I am seeking Software Development Engineer, Full Stack Developer, or AI Engineer opportunities where I can contribute to challenging projects, continuously learn emerging technologies, and grow as a software engineer while delivering high-quality and scalable products for the organization.

KEY EXPERTISE

Software Development Full Stack Development MERN Stack React.js Node.js Express.js FastAPI JavaScript Python C++ MongoDB REST API Development Artificial Intelligence Machine Learning LangChain RAG FAISS JWT Authentication Database Design Problem Solving Data Structures & Algorithms Git GitHub Cloud Deployment

EDUCATION

Institute of technology, Nirma University B.Tech. - Computer Science & Engineering CGPA: 9.11 / 10	2023 - 2027
Mauni Ankur School of Science, Surat City 12 th GSEB Percentage: 86 / 100	2023
P. P. Savani School, Surat 10 th GSEB Percentage: 96.67 / 100	2021

AWARDS AND SCHOLARSHIPS

- Mind Sprint 48-Hour International Hackathon (IronXman) Participant.
- Smart India Hackathon 2025 Participant.

INTERNSHIPS

UNIKWORK IT / Computers - Software Full Stack Developer Intern	11 May, 2026 - 24 Jun, 2026
--	-----------------------------

Key Skills:

Express.js TypeScript Material UI Responsive Design Frontend Development Redux Toolkit REST API Node.js JavaScript API Integration Git Tailwind CSS MongoDB React.js Full Stack Development Backend Development GitHub State Management UI Development

Completed a six-week Full Stack Development Internship at UNIKWORK, where I worked on enterprise-grade web applications using modern JavaScript technologies. Contributed to the development and enhancement of multiple modules by implementing responsive user interfaces, integrating RESTful APIs, and improving application performance. Worked extensively with React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Material UI, Redux Toolkit, and Git. Developed features such as dynamic dashboards, task management, drag-and-drop functionality, server-side filtering, authentication workflows, reusable components, and API integrations while collaborating with senior developers in an Agile development environment. Participated in debugging, code reviews, UI optimization, and feature enhancements to deliver production-ready software solutions. This internship strengthened my practical knowledge of full-stack development, software engineering best practices, API integration, collaborative development, version control, and real-world product development while improving my problem-solving and teamwork skills.

PROJECTS

FinChatBot – AI Financial Document Analysis

Mentor: Self Guided | Team Size: 1

Key Skills:

- React.js
- Node.js
- Express.js
- Python
- FastAPI
- MongoDB
- LangChain
- RAG
- FAISS
- Google Gemini API
- Groq API
- JWT Authentication
- REST API
- WebSocket
- JavaScript
- Tailwind CSS
- Git
- GitHub
- Cloudinary
- Vercel
- Render

Project Link: <https://github.com/Sarth00718/Financial-Chatbot->

Developed FinChatBot, a full-stack AI-powered financial document analysis platform that enables users to upload PDF, Excel, and CSV files and interact with their financial data through natural language queries. Designed and implemented the frontend using React.js and the backend using Node.js, Express.js, Python, and FastAPI. Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain and FAISS to provide context-aware responses from uploaded documents. Integrated Google Gemini and Groq APIs for intelligent financial analysis and conversational AI. Implemented JWT-based authentication, secure file handling, WebSocket-based real-time communication, and RESTful APIs. Deployed the application on Vercel and Render with MongoDB as the database, enhancing my expertise in full-stack development, AI integration, scalable backend systems, and cloud deployment.

Smart Expense Tracker – AI-Powered Personal Finance Management System

Mentor: Self Guided | Team Size: 1

Key Skills:

- React.js
- Node.js
- Express.js
- MongoDB
- JavaScript
- JWT Authentication
- OCR Tesseract
- OCR
- Chart.js
- REST API
- Tailwind CSS
- AI Integration
- PWA
- Git
- GitHub
- Vercel
- Render
- Render

Project Link: <https://smart-expense-tracker-rho-eight.vercel.app/>

Developed Smart Expense Tracker, a full-stack MERN application for personal finance management with AI-powered financial insights. Built an intuitive dashboard that enables users to record income and expenses, categorize transactions, monitor budgets, and visualize spending patterns through interactive charts. Integrated OCR using Tesseract to automatically extract expense details from receipt images, reducing manual data entry. Implemented JWT-based authentication, secure RESTful APIs, and responsive user interfaces using React.js and Tailwind CSS. Added an AI-powered finance assistant to provide personalized budgeting suggestions and spending analysis. Designed the application as a Progressive Web App (PWA) for a seamless mobile experience and deployed it using Vercel and Render with MongoDB as the backend database. This project strengthened my expertise in full-stack development, API integration, authentication, data visualization, AI-assisted applications, and scalable web deployment.

Vastra – MERN Stack E-Commerce Platform

Mentor: Self Guided | Team Size: 1

Key Skills:

- React.js
- Node.js
- Express.js
- MongoDB
- MERN Stack
- Firebase Authentication
- JWT Authentication
- Razorpay
- Cloudinary
- REST API
- JavaScript
- Tailwind CSS
- Responsive Design
- Git
- GitHub
- Vercel
- Render

Project Link: <https://github.com/Sarth00718/Vastra-cloth-shop>

Developed Vastra, a production-ready MERN Stack e-commerce platform that provides a complete online shopping experience for customers and an admin dashboard for store management. Designed and implemented responsive user interfaces using React.js and Tailwind CSS while building secure RESTful APIs with Node.js and Express.js. Integrated MongoDB for efficient product, user, and order management. Implemented Firebase Authentication and JWT-based authorization to ensure secure user access. Integrated Razorpay payment gateway for seamless online transactions and Cloudinary for efficient image storage and management. Developed features including product browsing, advanced search and filtering, shopping cart, wishlist, order management, inventory management, and order tracking. Deployed the frontend and backend using Vercel and Render, gaining practical experience in scalable full-stack development, payment gateway integration, authentication, cloud deployment, and modern e-commerce application architecture.

Real-Time Chat Application – MERN Stack Messaging Platform

Mentor: Self Guided | Team Size: 1

Key Skills:

- React.js
- Node.js
- Express.js
- MongoDB
- Socket.IO
- WebSockets
- Redux Toolkit
- JWT Authentication
- REST API
- JavaScript
- Tailwind CSS
- Responsive Design
- Git
- GitHub
- Vercel
- Render

Project Link: <https://github.com/Sarth00718/Real-Time-Chat-Application>

Developed a full-stack real-time chat application using the MERN Stack to enable instant messaging with secure authentication and real-time communication. Built responsive user interfaces using React.js and managed application state with Redux Toolkit to provide a seamless user experience. Implemented the backend using Node.js and Express.js, integrating Socket.IO and WebSocket technology to support instant one-to-one and group messaging without page refreshes. Secured user authentication and authorization using JWT and stored application data in MongoDB. Developed RESTful APIs for user management, conversations, and messaging while ensuring efficient database operations. Designed the application with a mobile-friendly responsive interface and deployed it using Vercel with

MongoDB Atlas as the database. This project enhanced my expertise in full-stack development, real-time systems, WebSocket communication, authentication, scalable backend architecture, API development, and modern web application deployment.

ACHIEVEMENTS

- Selected for Amazon Machine Learning Summer School 2025.
- Completed Full Stack Development Internship at UNIKWORK.
- Maintaining 9.11 CGPA in B.Tech Computer Science & Engineering at Nirma University.
- Developed 15+ Full Stack, AI, Machine Learning, and Data Analytics projects.
- Competitive Programmer on LeetCode, Codeforces, and CodeChef.
- Participated in Smart India Hackathon 2025.
- Participated in Mind Sprint 48-Hour International Hackathon (IronXman).
- Participated in Hackamind Hackathon organized by Nirma University.

ASSESSMENTS / CERTIFICATIONS

Smart India Hackathon 2025 – Participant

Provider: Government of India
Participated in Smart India Hackathon 2025, India's largest national innovation competition organized by the Government of India.

Mind Sprint 48-Hour International Hackathon (IronXman Track)

Provider: Unstop

Key Skills:

- Full Stack Development
- Artificial Intelligence
- Rapid Prototyping
- Machine Learning
- ReactJS
- NodeJS
- Express.js
- MongoDB
- REST
- Team Coordination
- Software Engineering
- Time Management
- Problem Solving
- Innovation

Participated in the Mind Sprint 48-Hour International Hackathon (IronXman Track) organized through Unstop, where our team successfully designed and developed **SmartBite** – an AI-powered Meal Planner and Nutrition Assistant within a strict 48-hour development timeline. I contributed to the system design, frontend and backend development, REST API integration, database design, and AI feature implementation using modern full-stack technologies. SmartBite provides personalized meal recommendations based on user preferences and nutritional requirements using collaborative filtering and K-Means clustering. We also integrated an AI-powered nutrition chatbot using the Groq API, nutrition tracking, weekly meal planning, automatic grocery list generation, and progress visualization through an intuitive user interface. The project was developed using React.js, Node.js, Express.js, MongoDB, and Machine Learning techniques while following Agile development practices. This hackathon strengthened my expertise in full-stack development, AI integration, rapid prototyping, teamwork, problem-solving, and delivering production-ready software solutions under tight deadlines.

SEMINARS / TRAININGS / WORKSHOPS

Amazon Machine Learning Summer School 2025 Institute Name: Amazon 09 Aug, 2025 - 31 Aug, 2025

Key Skills:

- Machine Learning
- Deep Learning
- Natural Language Processing
- Sequential Models
- Probabilistic Graphical Models
- Python
- Scikit-learn
- Model Evaluation
- Feature Engineering
- Artificial Intelligence
- Data Science
- Problem Solving

Selected among top engineering students across India for Amazon Machine Learning Summer School 2025, a prestigious training program conducted by Amazon. Successfully completed an intensive curriculum covering Machine Learning, Deep Learning, Natural Language Processing, Recommendation Systems, Sequential Models, and Probabilistic Graphical Models under the guidance of Amazon Scientists and industry experts. Participated in technical lectures, practical assignments, and discussions focused on real-world machine learning applications, model evaluation, feature engineering, and scalable AI systems. Gained hands-on exposure to modern ML techniques, industry best practices, and production-oriented AI workflows while strengthening analytical thinking, problem-solving abilities, and understanding of advanced machine learning concepts used in large-scale software products.

CO-CURRICULAR ACTIVITIES

- Participated in Amazon Machine Learning Summer School 2025.
- Participated in Smart India Hackathon 2025.
- Participated in Mind Sprint 48-Hour International Hackathon.
- Participated in Hackamind Hackathon at Nirma University.
- Regularly participate in coding contests and technical workshops.
- Develop full-stack and AI-based software projects beyond academic coursework.

EXTRA CURRICULAR ACTIVITIES

- Competitive Programming on LeetCode, Codeforces, and CodeChef.
- Open-source learning and personal software development.
- Exploring modern AI tools and technologies.

- o Attending technical webinars and developer conferences.
- o Building personal projects and experimenting with new technologies.

PERSONAL INTERESTS / HOBBIES

- o Problem Solving
- o Learning New Technologies
- o Building Full Stack Applications
- o Playing Games
- o Explore the world
